SECTION 4: First aid measures

4.1. Description of first aid measures General information Get medical attention. Inhalation Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Get medical attention if any discomfort continues. If breathing stops, provide artificial respiration. Ingestion Rinse mouth. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if any discomfort continues. Skin contact Remove contaminated clothing and rinse skin thoroughly with water. Continue to rinse for at least 15 minutes. Get medical attention if any discomfort continues. Eye contact Do not rub eye. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 15 minutes. Get medical attention if irritation persists after washing. 4.2. Most important symptoms and effects, both acute and delayed 4.3. Indication of any immediate medical attention and special treatment needed Notes for the doctor Treatment may vary with condition of victim and specifics of incident. SECTION 5: Firefighting measures 5.1. Extinguishing media Suitable extinguishing media Extinguish with dry sand. Alcohol-resistant foam. Carbon dioxide (CO2). Dry chemicals. Water spray.

Unsuitable extinguishing Do not use water jet as an extinguisher, as this will spread the fire.

media

5.2. Special hazards arising from the substance or mixture

Specific hazardsIrritating gases or vapours. Dust or gas may ignite by flames. Dust may form explosive
mixture with air. May explode when heated or when exposed to flames or sparks. Containers
can burst violently or explode when heated, due to excessive pressure build-up.

Hazardous combustion products	Oxides of carbon. Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapours.
5.3. Advice for firefighters	
Protective actions during firefighting	Keep up-wind to avoid fumes. Fight advanced or massive fires from safe distance or protected location. Avoid inhalation of materials or combustion by-products. Cool containers exposed to flames with water until well after the fire is out. Move containers from fire area if it can be done without risk.
Special protective equipment for firefighters	Use protective equipment appropriate for surrounding materials.
SECTION 6: Accidental release	e measures
6.1. Personal precautions, pro	tective equipment and emergency procedures
Personal precautions	Wear protective clothing as described in Section 8 of this safety data sheet. Avoid heat, flames and other sources of ignition. Keep upwind. Do not handle broken packages without protective equipment. Provide adequate ventilation. Avoid generation of dust.
6.2. Environmental precaution	S
Environmental precautions	Store away from waterwork or drainage system. Prevent run-off from entering ground, storm sewers and ditches which lead to natural waterways. If large spills, call emergency services to get advice.
6.3. Methods and material for	containment and cleaning up
Methods for cleaning up	Small Spillages: Collect spilled material in appropriate container for disposal. Large Spillages: Keep up-wind to avoid fumes. Build dikes to control spillage. Avoid lowland and keep upwind. Dispose of contents/containers in accordance with local / regional / national / international regulations.
6.4. Reference to other section	ns
Reference to other sections	For personal protection, see Section 8. For waste disposal, see section 13.
SECTION 7: Handling and sto	rage
7.1. Precautions for safe hand	ling
Usage precautions	Wear protective clothing as described in Section 8 of this safety data sheet. Storage tanks and other containers must be earthed. Avoid heat, flames and other sources of ignition. Wash thoroughly after handling. Do not act pressure, cutting, welding, soldering, drilling, grinding, etc. All handling should only take place in well-ventilated areas. Avoid handling which leads to dust formation. Avoid inhalation of dust and contact with skin and eyes. Avoid temperature >316 °C.
7.2. Conditions for safe storag	e, including any incompatibilities
Storage precautions	Store and handle in accordance with all current regulations and standards. Keep container tightly sealed when not in use. Store in tightly-closed, original container in a dry, cool and well-ventilated place. Do not store near heat sources or expose to high temperatures. Protect against direct sunlight.
7.3. Specific end use(s)	
Specific end use(s)	Not available.
SECTION 8: Exposure Contro	Is/personal protection
8.1. Control parameters Occupational exposure limits

Ingredient comments

No exposure limits known for ingredient(s).

8.2. Exposure controls

Appropriate engineering controls	Provide adequate general and local exhaust ventilation.
Eye/face protection	The following protection should be worn: Chemical splash goggles.
Hand protection	Wear suitable gloves.
Other skin and body protection	Wear suitable protective clothing.
Hygiene measures	Use engineering controls to reduce air contamination to permissible exposure level. Provide eyewash station and safety shower. Wash hands after handling.
Respiratory protection	If ventilation is inadequate, suitable respiratory protection must be worn. Under frequent use or heavy exposure, respiratory protection may be needed. In case of dust formation, wear respirator with particle filter.
